NANDA PUTRI RAMADHANI

Jambi City, Indonesia | +628-9562-2215-218 | nandaputri.job@outlook.com
linkedin.com/in/naandptr | github.com/naandptr

Backend-focused Web Developer with experience in building RESTful APIs using Laravel. Skilled in designing relational databases, implementing authentication (JWT & OAuth), and developing scalable backend systems. Experienced in handling multi-role access control and translating business processes into efficient and maintainable API structures.

EDUCATION

University of Jambi, Muaro Jambi 2021 - 2025

Bachelor of Computer Science (Information Systems)

GPA: 3.74 / 4.00 (Graduated with Honors)

Final Project: Design and Development of an Industrial Internship Information System using Scrum Method (Case Study: SMK Negeri 2 Kota Jambi)

PROJECT EXPERIENCE

Notes App API (Personal Project) March 2026

- Built a RESTful API for managing personal notes using Laravel 12
- Implemented JWT authentication and Google OAuth login
- Designed tagging system with many-to-many relationship
- Added search, pagination, and filtering features
- Structured consistent API responses and error handling
- Wrote feature tests using PHPUnit

Industrial Internship Information System - SMK Negeri 2 Kota Jambi February 2025 - March 2025

Scrum Master & Developer

- Designed relational database structure and system architecture
- Implemented authentication and role-based access control
- Applied MVC architecture using Laravel Blade
- Coordinated development process using Scrum methodology

WORK EXPERIENCE

PT Hayaa Investama Group, Jambi October 2025 - Present

Web Developer

- Developed RESTful APIs using Laravel to support end-to-end order-to-production workflows
- Designed and managed relational database schemas (orders, designs, productions, payments, shipments)
- Implemented multi-role access control (superadmin, admin, designer PIC, production PIC)
- Managed database migrations and seeders for development environments
- Translated business processes into backend logic and API endpoints
- Performed debugging and optimized application flow based on operational needs

SKILLS

- Backend: PHP, Laravel, RESTful API, MySQL
- Authentication & Security: JWT, OAuth (Google), Email Verification
- Frontend: HTML, CSS, JavaScript, Blade
- Tools: Git, Postman, PHPUnit, VS Code, Laragon/XAMPP, Trello
